2010 Michigan Notable Author

Jeff Alexander

Author Talk & Book Signing

Award-winning author and environmental journalist Jeff Alexander's new book explores how allowing ocean freighters into the Great Lakes 50 years ago unleashed one of the world's worst environmental disasters.

"PANDORA'S LOCKS should be required reading for every science class in America. And every legislator --D'Arcy Egan, Cleveland Plain Dealer

"...chronicles how the realization of a centuries-old dream of a commercial shipping passage between the Great Lakes and saltwater seas has spawned an invasion of foreign fish, pathogens and other unwanted that has damaged native fisheries, killed birds, and cost the public billions of dollars to control"

-- Dave Dempsey
